One Day Trips

Find trip | Publish a Trip | log out

If time display map with traject

from departure place to arrival place
km, travel duration
Date

Name

Meeting point: ~~xxxxxxxx xxx~~

Trip description

~~text~~

Price per seat: display price

Passengers on this trip

3 seats available

as much as icons as sits, empty if available, user pic if user

Book!

When book is clicked, it generate an toConfirmId in the db (users collection), then the trip owner will receive a message in his back office to confirm the trip
when the trip owned click on confirm button, the toConfirmId is removed, and a passengerId is add to the trip collection, then the trip booker will receive a message, you trip is confirmed

messages will also appear in back office when deletions happen, of a published trip or of a reservation trip
again the deletion of the id from the db will trigger the message

If time
build a page for each place getting info from google API
